

## Little Prince

Feedback on first presentation (Intro Giant)

Speed is much better.

This is our agenda

What about the rest of the introduction? How many parts (7)

I like the way you separated each part – speed here is good

Animate – bring points / parts on one-by-one or bit by bit \*\*

slide design in in a good direction – i.e., few words and simple pictures

overseas expansion

Jia – watch your body language (closed – see the video!)

See my points on notes – you might put notes on a phone / pad (I'll try and set up the teleprompter soon)

teacher's country – nice touch – think that could be another audience member you met – when they arrived at Giant to hear about your firm

I'll now handover to Vanessa to continue the presentation

Turnover – this slide is confusing – there are numbers and chart. I'm lost!

Some duplication here? Serina introduced products but now we are hearing about them again

Clear – but reduce the words on the slide

Do not change presenters at the last minute!
