Idea4 Introduce the study on patient satisfaction with ChatGPT's skin cancer responses, highlighting its potential to improve healthcare accessibility.

Idea5 Introducing the necessity of medical oversight for ChatGPT integration into healthcare to ensure information accuracy.

Opening of our presentation

Good afternoon. We are group Little Prince. Our team members are me, Serina, Jia and Vanessa.

This afternoon we are going to talk about a breakthrough in AI-driven virtual content generation.

We will present in 10 minutes, and please save the questions until the end. Please don't forget to mute your phone.

Our presentation is structured into 3 parts. Section 1 is the adoption of Chat GPT, section 2 is the survey of skin cancer questions, and section 3 is the conclusion.

Let's begin with the section 1. ...

Signaling sub-parts-Serina

In this part, we will explore ChatGPT's role in healthcare, particularly in skin cancer prevention and patient education, as introduced in the article.

Transition-close

That's all we want to say about this section. So on, Vanessa will take the next part.

Transition-open

Let's turn to the section 2. ...

Signaling sub-parts-Vanessa

In this part, we will talk about 10 questions of skin cancer questions and the responses of ChatGPT. Because of time limitation, I will only show you the first question. And there is satisfaction show how many people are satisfied with the response of ChatGPT.

Transition-close

That's all we want to say about this section. And Jia will talk about the next part.

Transition-open

Let's turn to the section 3. ...

Signaling sub-parts-Jia

In this part, we're going to talk about conclusion. We have 5 key points about this.
First healthcare accessibility. Second satisfied answers. Third misinformation risks.
Fourth medical oversight and fifth prevention is better than a cure. ...

Closing of our presentation

In conclusion, ...

Thank you all for listening.
